

<HTML>

Document Tags

HTML	define the beginning and end of the HTML document	BODY	define the document body
<code><HTML>content</HTML></code> <code><html>content</html></code>		<code><BODY attribute="value">content</BODY></code> <code><body attribute="value">content</body></code>	
HEAD	define the document header	<code>background = URL</code>	set background image
<code><HEAD>content</HEAD></code> <code><head>content</head></code>		<code>bgcolor = color</code>	set background color
TITLE	define the document title	COMMENT	define a nonexecutable comment
<code><TITLE>content</TITLE></code> <code><title>content</title></code>		<code><!-->content<--></code>	

Text Tags

P	define a text paragraph ending with a line break	BLOCKQUOTE	define a paragraph indented in a blocked quote
<code><P attribute="portion:value;">content</P></code> <code><p attribute="portion:value;">content</p></code>		<code><BLOCKQUOTE attribute="portion:value;">content</BLOCKQUOTE></code> <code><blockquote attribute="portion:value;">content</blockquote></code>	
<code>style = portion</code>	set the style of text in paragraph	<code>style = portion</code>	set the style of text in paragraph
<code>font-family:font_name;</code>	set text font type or family	<code>font-family:font_name;</code>	set text font type or family
<code>font-size:font_size;</code>	set font size in pixels or percentage	<code>font-size:font_size;</code>	set font size in pixels or percentage
<code>color:font_color</code>	set font color	<code>color:font_color</code>	set font color
<code>font-style:font_style</code>	set font style	<code>font-style:font_style</code>	set font style

BR define a line break

`
`
`
`

List Tags

OL	define an ordered list	LI	define a list element
<code><OL attribute="value">content</code> <code><ol attribute="value">content</code>		<code><LI attribute="value">content</code> <code><li attribute="value">content</code>	
<code>start = n</code>	start list numbering at <i>n</i>	<code>type = format</code>	set numbering format to specified UL/OL
<code>type = format</code>	set numbering format to <i>A, a, I, i, or 1</i>	<code>value = n</code>	set list element numbering to <i>n</i>

UL define an unordered list

`<UL attribute="value">content`
`<ul attribute="value">content`

`type = format` set bullet type to *circle, disc, or square*

Table Tags

TABLE	define a table	TR	define a row of cells
<code><TABLE attribute="value">content</TABLE></code> <code><table attribute="value">content</table></code>		<code><TR attribute="value">content</TR></code> <code><tr attribute="value">content</tr></code>	
<code>align = position</code>	align the table to surrounding content	<code>align = position</code>	horizontally align the row contents
<code>background = URL</code>	set background image	<code>background = URL</code>	set background image
<code>bgcolor = color</code>	set background color	<code>bgcolor = color</code>	set background color
<code>border = n</code>	define a border of <i>n</i> pixels	<code>bordercolor = color</code>	define the border color for the row
<code>bordercolor = color</code>	define the border color for the table	<code>valign = position</code>	vertically align the row contents
<code>cellpadding = n</code>	set <i>n</i> pixels of padding around contents		
<code>cellspacing = n</code>	set <i>n</i> pixels of padding between cells		
<code>height = n</code>	set height of table in pixels		
<code>width = n</code>	set width of table in pixels or percentage		
<code>valign = position</code>	vertically align the table contents		

TD	define a cell	TH	define a header cell
<code><TD attribute="value">content</TD></code> <code><td attribute="value">content</td></code>		<code><TH attribute="value">content</TH></code> <code><th attribute="value">content</th></code>	
<code>align = position</code>	horizontally align the cell contents	<code>align = position</code>	horizontally align the cell contents
<code>background = URL</code>	set background image	<code>background = URL</code>	set background image
<code>bgcolor = color</code>	set background color	<code>bgcolor = color</code>	set background color
<code>bordercolor = color</code>	define the border color for the cell	<code>bordercolor = color</code>	define the border color for the cell
<code>colspan = n</code>	cell straddles <i>n</i> adjacent columns	<code>colspan = n</code>	cell straddles <i>n</i> adjacent columns
<code>height = n</code>	set height of cell in pixels	<code>height = n</code>	set height of cell in pixels
<code>rowspan = n</code>	cell straddles <i>n</i> adjacent rows	<code>rowspan = n</code>	cell straddles <i>n</i> adjacent rows
<code>width = n</code>	set width of cell in pixels or percentage	<code>width = n</code>	set width of cell in pixels or percentage
<code>valign = position</code>	vertically align the cell contents	<code>valign = position</code>	vertically align the cell contents

Image Tags

IMG	display an image from a file
<code></code> <code></code>	
<code>align = position</code>	align the image to surrounding content
<code>border = n</code>	define a border of <i>n</i> pixels
<code>height = n</code>	set width of image in pixels
<code>src = URL</code>	set the source of the image
<code>width = n</code>	set width of image in pixels or percentage

Link Tags

A	define a hyperlink or fragment
<code>content</code> <code>content</code>	
<code>href = URL</code>	set the URL of hyperlink
<code>mailto:email_address</code>	open email client to send email
<code>name = name</code>	set the name of fragment

Format Tags

B and STRONG	bold a section of text	I and EM	italicize a section of text
<pre>content content content content</pre>		<pre><i>content</i> <i>content</i> content content</pre>	
INS	underline a section of text	DEL	strikethrough a section of text
<pre><INS>content</INS> <ins>content</ins></pre>		<pre>content content</pre>	
SUB	subscript a section of text	SUP	superscript a section of text
<pre><SUB>content</SUB> <sub>content</sub></pre>		<pre><SUP>content</SUP> <sup>content</sup></pre>	
CODE	format a section of text to a fixed-width code	HR	set a horizontal rule
<pre><CODE>content</CODE> <code>content</code></pre>		<pre><HR /> <hr /></pre>	
DIV	define a division of text for style formatting	SPAN	define a span of text for style formatting
<pre><DIV attribute="value">content</DIV> <div attribute="value">content</div></pre>		<pre>content content</pre>	
<i>align = position</i>	align the division to surrounding content	<i>align = position</i>	align the division to surrounding content
<i>style = portion</i>	set the style of text in paragraph	<i>style = portion</i>	set the style of text in paragraph
<i>font-family:font_name;</i>	set text font type or family	<i>font-family:font_name;</i>	set text font type or family
<i>font-size:font_size;</i>	set font size in pixels or percentage	<i>font-size:font_size;</i>	set font size in pixels or percentage
<i>color:font_color</i>	set font color	<i>color:font_color</i>	set font color
<i>font-style:font_style</i>	set font style	<i>font-style:font_style</i>	set font style
